Welcome

Dear iRobot® Braava® Owner,

Welcome to the world of iRobot. As an owner of the iRobot Braava Floor Mopping Robot, you join a growing group of people around the globe who, like you, are discovering an easier way to mop their floors.

The use of practical robots that help you in and around your home is a new reality. We encourage you to share your feedback as we continue to develop new and groundbreaking robots. Here’s what you can do to participate in our efforts:

• Communicate with us if you have questions, comments or require support. Contact us at global.irobot.com.

Thank you for joining the robot revolution. We look forward to your valued input as we continue to deliver groundbreaking products that will change and improve your world.

On behalf of the entire iRobot team,

Colin Angle
Co-Founder and CEO
iRobot Corporation

IMPORTANT SAFETY INSTRUCTIONS
TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY

WARNING: READ AND SAVE THESE INSTRUCTIONS.
To avoid the risk of injury or damage, these basic precautions should always be followed:

• Read all safety and operating instructions before using Braava.
• Read and heed all warnings in this manual and on Braava, the Cube, and the adapter.
• Only use Braava in accordance with the specifications outlined in this manual.
• Do not attempt to repair or adjust any electrical or mechanical functions on this device. Tampering with these functions may create a hazardous condition, and it will void your warranty.
• Be aware that floors may be slippery after wet cleaning with Braava.
• Braava operates very quietly. Take care when walking in the area Braava is cleaning to avoid stepping on Braava and tripping.

USE RESTRICTIONS
• Braava is not a toy. Supervise children and pets when Braava is cleaning.
• Braava has electrical parts. Do not spray, rinse, or submerge it in water. Clean with a dry cloth only.
• Braava is for indoor use on hard surface floors only.
• Do not use Braava to pick up large debris, liquid spills, bleach, paint, or other chemicals.
• Do not use Braava near any objects that are burning or smoking.
• Before using Braava, remove fragile objects from the cleaning area, including objects on furniture that may fall if the furniture is pushed or bumped.
• Move any power cords, as well as cords for blinds and curtains, out of the way to reduce the risk of objects being pulled down.
• Block off access to open balconies near the cleaning area with physical barriers.
• Make sure the cleaning cloth does not drape into the middle channel between the gripping strips, as this could impede sensor functions and safe operation. See page 18 for further details.
• When mopping, do not use Braava in areas where wetness can damage unfinished or unsealed floors, or delicate carpeting or rugs.
• Operate at room temperature. Do not expose Braava or its batteries to freezing or extreme heat.
• This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

BATTERY AND CHARGING

⚠️ Warning: Do not use non-rechargeable batteries. Use only the rechargeable battery that was provided with this robot. Only use a battery of this type and rating: Ni-MH 7.2V, 2000mAh, red wire (+) black wire (-).

• Charge using a standard 220-240 V socket only.
• Do not dismantle, open, or shred secondary cells or batteries.
• Do not expose cells or batteries to heat or fire. Avoid storage in direct sunlight.
• Do not subject cell or batteries to mechanical shock.
• In the event of a cell leaking, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice.
• Battery usage by children should be supervised.
• Always purchase the battery recommended by iRobot for the appliance.
• Keep cells and batteries clean and dry.
• Use the cell or battery only in the appliance for which it was intended.
• The battery must be removed from the appliance before it is scrapped.
• The appliance must be disconnected from the power supply (adapter) when removing the battery.
• The battery must be disposed of safely. Please contact your local or regional waste authority for more information on collection, reuse, and recycling programs.
• Do not use an adapter with a damaged cord or plug.
• Do not handle or charge Braava when your hands are wet.
• Always disconnect Braava from the adapter before cleaning.
This symbol on your device indicates:
This symbol on your device indicates that there is a detachable power supply (adapter) unit.

⚠️ Warning: For the purposes of recharging the battery, use only the power supply (adapter) provided with the robot.

Should you require a replacement adapter, only purchase one of the adapters listed below, depending on which region you are in. Replacement adapters and batteries can be purchased at www.iRobot.com or through your local iRobot Service Centre.

The adapter must be disconnected prior to removing the battery, cleaning, or maintaining the robot.

This symbol on the product or its packaging indicates:
Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities. Contact the appropriate local department government for information regarding the collection systems available. If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being. When replacing old appliances with new ones, the retailer is legally obligated to at least take back your old appliance for disposal free of charge.

Notice: Braava contains a software interface for the purpose of enabling the manufacturer to provide updates to the internal firmware if any such updates are made available to users. Any attempt to access, retrieve, copy, modify, distribute, or otherwise use any of the Braava software is strictly prohibited.

WARNING: Changes or modifications not expressly approved by iRobot could void your warranty.

THIS APPLIANCE CAN BE USED BY CHILDREN AGED 8 YEARS AND ABOVE AND PERSONS WITH REDUCED PHYSICAL, SENSORY, OR MENTAL CAPABILITIES, OR LACK OF EXPERIENCE AND KNOWLEDGE ONLY IF THEY HAVE BEEN GIVEN SUPERVISION OR INSTRUCTION CONCERNING USE OF THE APPLIANCE IN A SAFE WAY AND UNDERSTAND THE HAZARDS INVOLVED. CHILDREN MUST NOT PLAY WITH THE APPLIANCE. CLEANING AND USER MAINTENANCE SHALL NOT BE DONE BY CHILDREN WITHOUT SUPERVISION.

In accordance with (EU) 2019/1782 Energy Efficiency Requirements the following specifications apply to the external power supply (EPS) provided with all 300 Series products

Braava Overview

Braava

1. Control Buttons
2. NorthStar® Navigation Sensor
3. Navigation System Indicator
4. Bumper
5. Handle
6. Cube on/off button (on back corner)
7. Removable Cleaning Pad

8. Battery Charging Port
9. Floor Transition Sensors
10. Wheel Guards
11. Charging Adapter
12. Turbo Charge Cradle (Ships with Selected Models)
Multi-Purpose Cleaning Pad

For dry sweeping or wet mopping, disposable or reusable microfibre cloths.

- 13 Cloth Gripping Strips
- 14 Middle Channel for Floor Transition Sensors

Pro-Clean Reservoir Pad (Ships with Selected Models)

For wet mopping with the blue Pro-Clean microfibre cleaning cloth.

- 15 Fill Cap
- 16 Reservoir
- 17 Wick
Buttons and Lights

1. **Power Button**
   - Press once to turn Braava on.
   - Hold for 2 seconds to turn Braava off.
   - **Blue solid light:** Power on
   - **Red blinking light:** Battery starting to get low
   - **Red solid light:** Low battery (needs to be recharged)

2. **Sweep Button**
   - For use with dry cloths.
   - Press once to start cleaning.*
   - Press while cleaning to pause.
   - **Blue solid light:** Sweep mode activated
   - **Blue blinking light:** Sweep mode paused

3. **Mop Button**
   - For use with wet cloths.
   - Press once to start cleaning.*
   - Press while cleaning to pause.
   - **Blue solid light:** Mop mode activated
   - **Blue blinking light:** Mop mode paused

*Holding the cleaning mode button will activate Quick Clean Mode. See page 15.
Navigation System Indicators

NorthStar Connection

- Blue blinking light (1): Establishing connection
- Blue solid light (1 to 3): Locked on to NorthStar Cube

The number of lights indicates the strength of Braava’s connection to the navigation system, with 3 being strongest. If there are no lights, Braava does not detect a NorthStar signal.

Other States

- Blue lights flashing in sequence: Thinking
- Blue lights flashing with pause: Sleep mode
- Red light in middle: Error*

*See troubleshooting section for more information.

NorthStar® Navigation Cube Lights

- Blue blinking light: Power on, broadcasting signal
- Blue solid light: Power on, connected to Braava
- Red solid light: Batteries low
Battery and Charging

</tbody>
</table>

**Charging**

- Stand Braava on its end to access the charging port.
- Plug the adapter into a standard electrical socket and into Braava’s charging port. The power button will regularly flash red.
- Charge Braava until a flashing blue light appears on the power button*.
- It may take Braava a few charging cycles to reach its full capacity.

*The blue light indicates on average that the battery has charged to 80% of its capacity.

Charging time and run time can be affected by operating temperature, floor type, and other conditions.

**TIP:** Braava can also be charged with the Braava Turbo Charge Cradle. See Cradle instructions for details (pg.11).

**CAUTION:** Do not charge Braava while the Pro-Clean reservoir pad or any wet cloth is attached. Charge using a standard 220-240 V socket only. Only use the included adapter to charge Braava. Always disconnect Braava from the adapter before cleaning.
The NorthStar Navigation Cube

The Cube uses 2 C batteries. The battery door can be found on the bottom of the Cube.

Charging Indicators

(While Plugged In)

- **Power Button**
  - **Red flashing light:** Battery charging
  - **Blue flashing light:** Battery charged

Please dispose of all batteries properly by finding a recycling resource near you.
Sweep and Mop Modes

Braava sweeps and mops hard surface floors using readily available dry and wet cleaning cloths or the included reusable microfibre cloths.

Braava is not a vacuum and is not intended for use on carpets.

**Sweep Mode**

Sweep mode is intended for cleaning with a *dry cloth*.

In Sweep mode, Braava moves ahead in a straight line when it begins cleaning, then cleans back and forth in parallel lines.

It is ideal for picking up dust, dirt, and hair to maintain clean, grit-free floors every day.

**Mop Mode**

Mop mode is intended for cleaning with a *wet cloth*.

In Mop mode, Braava drives forward a short distance to one side, backs up slightly, then moves forward to the other side, alternating to the left and right as it progresses.

This mopping action helps dissolve and pick up the deeper dirt and grime on your floors.

Braava automatically adjusts to a smaller cleaning area in Mop mode to optimise cleaning while the cloth is wet.

*TIP: Start with dry Sweep mode to pick up surface grit and then follow with a wet cloth in mopping mode to get a deeper clean.*
Cleaning Cloths

Disposable Cloths
For use only with the Multi-Purpose Cleaning Pad.

• Braava is compatible with most disposable dry and pre-moistened cleaning cloths, such as Swiffer® brand.

• Always follow the use and care instructions included with any dry or wet cleaning cloths to care for your floors.

• Please note that Braava is not compatible with Swiffer® WetJet® Refills.

Microfibre Cloths
Braava’s specially designed microfibre cloths can be washed and reused.

• White cloths are for dry sweeping with the Multi-Purpose Cleaning Pad.

• Blue textured cloths are for mopping and can be used with either the Pro-Clean Reservoir Pad or the Multi-Purpose Cleaning Pad. Dampen cloth before use.

⚠️ NOTICE: Wet cloths may not be suitable for cleaning unsealed floors. Ask your flooring manufacturer or installer if you are unsure whether damp mopping is safe for your floor.

Floor Types

• Braava is designed to clean hard surface floors including wood, tile, vinyl, linoleum, and laminate.

• Braava cleans best on smooth, hard surfaces and may not perform on uneven tiles, heavily waxed floors, or rough surfaces like slate or brick, which can snag the cleaning cloth.

⚠️ NOTICE: Braava is not intended to pick up large debris. Before cleaning with Braava, pick up large debris and check for gravel or sharp objects that could scratch the floor if captured under the cleaning pad.
How Braava Cleans

Braava intelligently cleans your floor by mapping the room as it cleans.

Cleaning Cycle

• Braava cleans your home in sections, first cleaning areas to its right, and later returning to areas to its left.

• When the open areas in each section are complete, Braava cleans along the edges of furniture and walls before moving on.

• When finished, Braava returns to where it started and parks itself.

Cleaning Pattern

• In open areas, Braava methodically cleans back and forth across your floor.

• As Braava encounters chair legs, furniture, and other obstacles, it cleans around them and continues its cleaning pattern.

• Braava detects stairs and will manoeuvre away from drop-offs and back to the cleaning area.

As a safety precaution, open ledges or balconies with a drop of .61 metres or greater should be blocked off with a physical barrier.

• Braava also detects area rugs and raised transitions to carpet so it can avoid driving onto them.

Note: If your carpet is flush with your hard surface floor, you may need to add a temporary barrier to provide Braava with a boundary it can detect.

• Braava follows along walls and edges as it encounters them and as it completes each section it cleans.
Quick Clean Mode

• Cleans 30% faster by focusing cleaning on open areas.

• Activate by holding the Sweep or Mop button for 3 seconds.

• You will hear a single beep, followed by the “start cleaning” song.

• Braava typically cleans the same total area as the standard detailed cleaning mode, but will skip detailed cleaning around furniture and some walls to save time.

Pause / Resume

Braava will automatically pause if you pick it up or press any button while cleaning.

• The cleaning mode button will flash blue to indicate the cleaning cycle is paused. While paused, Braava will save the map of the area it has already cleaned.

• To resume cleaning, place Braava within 1.83 metres of the Cube where it originally started, facing in the same general direction as it started.

• Press the flashing cleaning mode button.

• Braava will start cleaning while it determines its position on the map. Once it confirms its position, it will drive to an area not yet covered and continue cleaning.

• Braava may re-clean an area already covered or explore new areas of cleaning while determining its position on the map.

• If you resume Braava where you paused it, it may take longer for the cleaner to determine its position, depending on its distance from the Cube.

• To exit Pause and quit the cleaning cycle, power Braava off by holding the power button for 2 seconds.

Note: Braava can only be paused after it has locked on to the NorthStar Navigation Cube at the beginning of the cleaning cycle.
NorthStar® Navigation

The NorthStar Navigation Cube acts as a beacon, emitting a signal that guides Braava’s cleaning.

Connecting to the NorthStar Navigation Cube

• Once Braava starts cleaning, it tries to establish a connection to the NorthStar Navigation Cube, indicated by one flashing blue light on the Navigation System Indicator. Once Braava has locked on to the Cube, Braava’s lights turn solid blue.

• The Navigation System Indicator also indicates Braava’s range. As Braava gets to the edge of its range (such as going out of the room or far from the NorthStar Navigation Cube), the number of lights will go down.

• Braava may occasionally drive back towards the NorthStar Navigation Cube to confirm its position before continuing on its cleaning path.

• Braava builds a new map each time it starts a new cleaning cycle, but retains its map if paused during the cleaning cycle.

Cleaning without a NorthStar Navigation Cube

• Because the Cube is just one part of the Navigation System, Braava can still clean without a NorthStar signal present, however the cleaning area will be much smaller and Braava will not be able to perform edge cleaning in each section.

Cleaning with multiple NorthStar Navigation Cubes:

• Braava can use multiple NorthStar Cubes to clean multiple rooms and large spaces when dry sweeping. Braava will move from one Cube to the next, extending the cleaning area with each Cube it encounters.
Setting Up NorthStar Navigation Cubes

Using Braava with one Cube

- Place the Cube near the centre of the area you want to clean and start Braava nearby.

- Braava will clean the area around the Cube, and may extend into other rooms based on the cleaning mode and how far the NorthStar signal reaches.

- If you have a choice of rooms, place the Cube in a larger room to maximise NorthStar coverage.

- Once Braava has completed its run, you can move the Cube to clean a different part of your home.

Using Braava with multiple Cubes:

- Use one or more extra Cubes (sold separately) to expand how far Braava cleans in a single run.*

- Place extra Cubes in rooms or areas next to the area covered by the first Cube. The Cubes should typically be between 6 and 7 metres apart from each other for the NorthStar coverage to overlap.

- Braava will automatically clean from one Cube to another.

*Cubes are pre-programmed to different NorthStar channels, indicated on the bottom of the Cube. Cubes with different channels must be used for multi-Cube cleaning.
Operating Braava

Put On a Cleaning Cloth

1. Set Braava on its end and remove the cleaning pad.

2. Attach a dry or wet cloth to the Multi-Purpose cleaning pad. Lay the removable pad on an open cleaning cloth. Attach the cloth by tucking it into the gripping strips on both sides. See the following page for the Pro-Clean Reservoir Pad.

3. Re-attach the cleaning pad. Magnets will help it snap back into place.

CAUTION: Make sure the cleaning cloth does not drape into the middle channel between the gripping strips, as this could impede sensor functions and safe operation.
Using the Pro-Clean Reservoir Pad
(Also available as an accessory)

The Pro-Clean Reservoir Pad dispenses liquid as Braava mops to keep the cleaning cloth wet for longer.

Fill the reservoir

1. Open the fill cap by pulling and swivelling it to the side.

2. Fill the reservoir (maximum capacity is 100mL) with water and replace the fill cap, pressing it in securely so it does not leak. Visit global.irobot.com for information about other cleaning solutions.

3. Fill the reservoir over a sink, as a small amount of fluid can leak out when the fill cap is closed.

4. Dampen the blue Pro-Clean microfibre cloth and press it onto the velcro strips. Do not use a dry cloth.

TIP: Fluid dispenses at different rates depending on the floor type and solution used. The first time you mop, start with the cloth only slightly damp, and then increase the starting cloth wetness if needed.

⚠️ NOTICE: To avoid the Pro-Clean Reservoir Pad leaving excess fluid on your floor, do not leave Braava unattended when mopping and remove it from the floor once Braava stops cleaning.

When mopping is finished:

- Empty any remaining fluid from the reservoir.
- Leave the fill cap open to allow the reservoir to dry completely. Do not store the pad on Braava if it is wet.
- See page 22 for care instructions.
Place the NorthStar® Cube

1. Press the button on the back corner of the NorthStar Navigation Cube to turn it on. A blue light will flash on the opposite corner when turned on, and then go solid when Braava locks on to it.

   If you forget to turn the Cube on, Braava will send a signal to try to turn it on. If Braava is successful, the blue flashing light will appear on the Cube.

2. Place the NorthStar Navigation Cube on a table or worktop, pointing the blue light away from walls and towards the middle of the room.

For Best Results

- Place the NorthStar Navigation Cube where it has a clear view of the ceiling (for example, no cabinets or shelves directly above it).
- Do not move the NorthStar Navigation Cube once Braava has started cleaning, as this may impair Braava’s cleaning performance.
- Do not put the NorthStar Navigation Cube on the floor, as the cleaner may run into it and move it.
Start Cleaning

Place Braava on the floor within 2 to 2.5 metres of the NorthStar Navigation Cube, facing towards the Cube.

1. Turn Braava on using the power button.  
   *The button will light up blue when the cleaner is on.*

2. To start cleaning with a DRY CLOTH, just press the Sweep button.

3. To start cleaning with a WET CLOTH, just press the Mop button.

- One blue light will start blinking on the Navigation System Indicator if Braava detects a signal from the Cube. The light will turn solid blue once it locks on to the Cube. *If no lights appear, Braava does not detect a NorthStar signal.*

- When Braava finishes cleaning, it plays a short song, returns to where it started, and parks itself. Braava will also do this if the battery runs low while cleaning.

- To turn Braava off, press the power button for two seconds. A tune will play and the light will turn off.

- To turn off the NorthStar Navigation Cube, press the button on the back corner. The light on the opposite corner will turn off.
Maintenance

To keep your Braava in the best working condition, follow these maintenance steps.

Cleaning and Storing

- Use a dry cloth to wipe dust or dirt from Braava’s exterior. Do not rinse or submerge in water.

- Use a damp cloth to wipe off dust and dirt on tyres. Make sure that Braava is not plugged in and that the cloth is not dripping.

- Place Braava on its end (handle side down) when charging or storing between uses.

- For long term storage, remove the C batteries from the NorthStar Cube.

Wheel Guard

- As Braava cleans, debris may accumulate around the Wheel Guards. This helps keep Braava’s wheels moving freely.

- Periodically check Braava’s wheels to see if debris has accumulated, and remove as needed.

- A small notch next to the wheel allows access with tweezers or scissors if needed to free the debris.
Pro-Clean Reservoir Pad

- Hand rinse with water in the sink to clean. Do not put the reservoir pad in the dishwasher. Do not wash with soap.

- Let dry completely before re-attaching to Braava after cleaning is complete.

- The wick is designed for repeated use. Do not remove the wick cap between cleaning operations.

- If the wick cap becomes dirty or shows wear, it can be replaced.
  - Remove the wick cap by pulling on the side rubber tab.
  - Replace with a new wick cap, pressing firmly into place to create a tight seal to prevent leaking.

Removing or Changing the Battery

- With Braava® unplugged and pad the and cloth removed, place Braava® on a flat surface with its wheels facing up.

- Locate the battery compartment screw between the wheels.

- With a coin or flathead screwdriver, remove the screw and open the battery door.

- Lift the battery pack out of the robot and gently unplug the connector from the port.

- Plug the connector of your new Braava® battery pack into the port.

- Place the battery pack into Braava®, ensuring the connecting wires are tucked into the compartment.

- Reinstall the battery door and secure the screw using a flathead screwdriver or coin.

TroubleShooting

Visit global.irobot.com for additional tips and troubleshooting.

Error Indicators on the Navigation System Indicator (NSI) while cleaning

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Likely Cause</th>
<th>What To Do</th>
</tr>
</thead>
</table>
| Solid red light on the middle NSI. | System error | • Press and hold the power button to turn Braava off.  
• Vigorously rotate both wheels for 15 seconds.  
• Place Braava on the floor and power it on. Make sure a dry cleaning cloth has been applied.  
• If the red light is gone, press Sweep.  
• If the red light persists, contact Customer Support. |
| Red light blinks 2 to 6 times on the middle NSI. | Braava is stuck in its environment and cannot free itself. | Remove Braava from the situation and restart in a new area. |
| Red light blinks 14 times on the middle NSI. | Braava has detected the motor is getting too hot. | Turn Braava off and let it cool down before resuming cleaning. |
| Red light blinks 15 times on the middle NSI. | Braava is stuck in too small of an area and cannot free itself. | Remove Braava from the situation and restart in a new area. |
| Red light on the middle NSI when pressing Sweep or Mop, accompanied by 3 beeps. | A sensor is activated, so Braava won’t start driving. | Remove and reapply the cleaning cloth. When reapplying, follow these instructions:  
• Ensure the cloth does not overlap into the middle channel of the removable cleaning pad  
• Ensure the cloth is not bunching up, which can prevent the removable pad from reattaching completely to the robot. |

### General Troubleshooting

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Likely Cause</th>
<th>What To Do</th>
</tr>
</thead>
</table>
| **Braava Cleans only a small area.** | Cube not being used | Make sure the Cube is turned on and placed in the area you want to clean. Check the position of the Cube for interference such as:  
• Cabinets, shelves, or ceiling fans above the Cube.  
• Very high, uneven, or black ceilings above the Cube.  
• Plasma or LCD televisions within 5 feet of the Cube. |
| Cleaning cloth application | Remove and reapply the cleaning cloth. When reapplying, follow these instructions:  
• Ensure the cloth does not overlap into the middle channel of the removable cleaning pad  
• Ensure the cloth is not bunching up, which can prevent the removable pad from reattaching completely to the robot. |
| Problem with wheels or treads | Check the wheel area for debris and remove or clean as needed. Examine the tyre treads to make sure they are securely attached to the wheel. If not well attached, contact Customer Support. |
| **Braava is not driving properly.** | Wheels slipping | Clean the wheels with a cloth dampened with warm water to remove dust and cleaning solution. Let the wheels dry before cleaning again. |
| Cleaning cloth application | Remove and reapply the cleaning cloth. When reapplying, follow these instructions:  
• Ensure the cloth does not overlap into the middle channel of the removable cleaning pad  
• Ensure the cloth is not bunching up, which can prevent the removable pad from reattaching completely to the robot. |
| Problem with wheels or treads | • Check the wheel area for debris and remove or clean as needed.  
• Examine the tyre treads to make sure they are securely attached to the wheel. If not well attached, contact Customer Support. |
| **Braava is backing up.** | Floor transition sensor is activated | Remove and reapply the cleaning cloth. When reapplying, follow these instructions:  
• Ensure the cloth does not overlap into the middle channel of the removable cleaning pad  
• Ensure the cloth is not bunching up, which can prevent the removable pad from reattaching completely to the robot.  
If flooring is uneven or has wide grout lines, place Braava on smoother flooring to see if the problem persists. |
| **Braava drives off and does not clean where I started it.** | Braava is in Pause/Resume mode | Braava may still be in pause/resume mode from a previous cleaning run. Tap the power button to exit pause/resume mode. |
| **When resuming after pausing, Braava cleans the same area.** | Robot position when resuming | It is normal for Braava to re-clean an area while trying to find its position.  
• To help Braava find its position quickly, restart Braava near the Cube in the same orientation and location as the beginning of the cleaning cycle.  
• If Braava does not successfully find its position, it will start a new cleaning cycle. |
| **Braava won’t hold a charge.** | Incorrect adapter or battery | Confirm the adapter has the same model number as noted on the bottom of your Braava and use only an official Braava battery. If the problem persists, contact Customer Support.  
Battery needs refresh charge | Charge Braava for 12 hours using the adapter and not a Cradle, then run Braava until the battery fully depletes. Repeat 3 times to achieve expected run times. |
